

## Sustainability in the Classrooms: (Gr. K-7) Raincoast Sustainable Living School Programs

September: What is sustainability? An Introduction

October: *Vermiculture* (setting up composting bins in the classroom & learning about the vermi. process)

October/November: Salmon Sustainability Program

December: Sustainable gift giving (strong art/culture/community focus)

January: Climate Change (These lessons are suitable for Gr. 2 and older)

February: Sustainable Happiness (strong art/culture/community focus)

March: Watershed Stewardship Program (strong cross-cultural and global studies component)

April: Earth Month Program (Time for planting! Strong outdoor component)

Please call Kimberly Johnston at 250.725.2560 to organize lessons for your classroom. If there is a subject that has not been mentioned on this list that you would like us to teach please let us know and we will do our best to accommodate your prescribed learning objectives.

**We are also available to conduct naturalist programs**

(outdoors and indoors) with your

classes on a variety of subjects. Call or email for more details.
